SHORT BIO

Dr. Pavlina Psychouli is an Associate Professor of Occupational Therapy and Neurorehabilitation and the founding Coordinator of the BSc Occupational Therapy and MSc Neurorehabilitation programs at European University Cyprus. She received her B.Sc. in Occupational Therapy from the Technical Educational Institute of Athens (TEI) in 2001, her MSc in Neurorehabilitation from Brunel University, London, UK in 2003 and her Ph.D. in Constraint-Induced Therapy from Southampton University in 2009. She worked as a clinician for many years with various populations of both children and adults and is still clinically active. Her research interests include movement rehabilitation after brain insults, technological advancements used as part of intervention methods, tele-rehabilitation and living labs methodology. The main populations of her interest include stroke, cerebral palsy and multiple sclerosis. She has also been involved in research projects related to refugees' integration as part of the Occupational Therapy curriculum that she designed for EUC in 2015. Her work is published in high-impact conference proceedings and journals, such as the World Federation of Occupational Therapists (WFOT) Congresses and the American Journal of Occupational Therapy (AJOT).
